STRUCTURAL STEEL

Weatherspoon & Williams LLC supplies many types of steel structures including overhead sign structures, box trusses, monopoles, cantilever structures, beams and bridge girders.

Weatherspoon & Williams LLC is also a supplier of the steel foundation and can provide a packaged product delivered to the job site, including both structure and foundation.

FABRICATED STEEL

At Weatherspoon & Williams, we provide any size steel girders or beams used to make bridges in several states. We service many states from four locations, and have made and shipped 20’ girders up to 150’ girders, depending on the job. These girders weigh anywhere from 5,000 lbs. to 130,000 lbs. We have several different types of equipment to haul these and drivers with several years of experience to get them safely to the job site.

MISCELLANEOUS METALS

Pictured Above is Small
Parts Fabrication of the 2019 New Signage for the Greater Pittsburgh International Airport

WWLLC has begun fabrication at the Houston small parts warehouse on the AM/FM Supports for the Liberty Tunnel Project in Pittsburgh, PA. We are providing new lights and bracket supports. Soon you will be able to have radio and cell service through the Liberty Tunnel in Pittsburgh!!

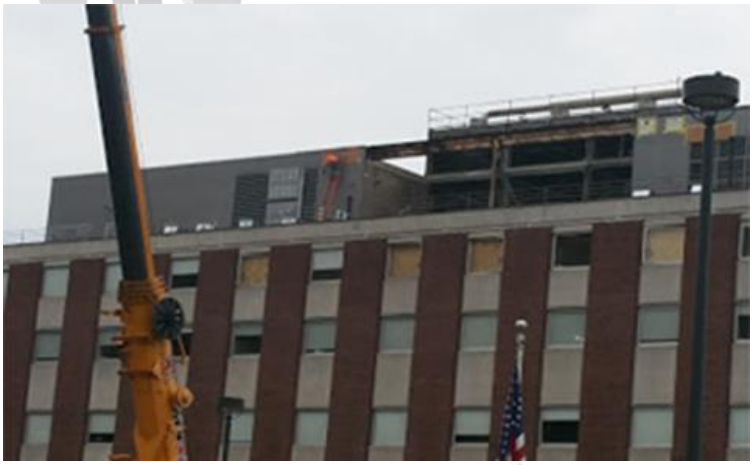
RAILING

Area Lower F&G roofs installation Presbyterian Hospital

RAILING CONT.

Hillman Cancer Center A-W roof: Gate installed at ladder location.

ROOF SCREEN



WWLLC successfully completed fabrication and installation of Roof Support Steel, Screen Support Steel, and Decorative Screen Wall on the 13th floor/roof of the intercity hospital, UPMC Montefiore.

Pictured left is the partially completed framework protecting all of the roof equipment of the 13th floor on Montefiore Hospital. This roof's screen provides protection for all employees while they maintain critical hospital equipment.

WWLLC's subcontractor/erector provides union ironworkers to install this project. Pictured above is the initial framework being put into place.

The finished screen wall project provides both safety and an appealing aesthetic for the front of UPMC Montefiore Hospital. Please visit another successful WWLLC project at UPMC Montefiore.

SIGNAGE

Weatherspoon and Williams has the ability to provide signage in a wide range of architectural projects. Pictured is an example of first surfaced graphics on glass in a parking facility. We can provide many types of signage to suit the visual identification needs of architectural structures.

Pictured is a building application of 3-dimensional lettering applied to the port authority of Allegheny county First Avenue Garage. There is no sign too small or too big for our Building Signage Division. We are able to provide interior and exterior designs per ADA specifications or a specific architect's design.
